

KONGO CO., LTD.

Company Profile

Designing the Space

KONGO assists our customers to design the space according to their intended purpose of the facility.

Last Updated On:
September 21, 2024

■ About Company

Founded in 1947, Kongo has since been successful in continuously expanding our business due to our valuable know-how gathered as a manufacturer.

Recently, as a maker who leads in creating new systems in logistics distribution, new offices and security needs, we are dedicated to solving the challenges faced by our clients.

By leveraging cutting-edge information technology, we strive to deliver solutions that optimize manpower, minimize space requirements, and reduce energy consumption.

■ RECOGNITION AND RELIABILITY

Beside receiving honorable prizes, our products have been awarded for "Good Design Gold Prize" for four years. We are now one of the leading companies in our industry.

■ Our Vision

To seek innovative solutions, keeping pace with technological advancements but also align with the expectations of our customers.

■ Our Mission

To continue to abide at all times our company's policy; "Customer's First and Quality First" in both our services and products, by focusing in providing efficient solutions with innovative quality products, ensuring a safer and more comfortable space for users.

■ Our Strength

01

Products

KONGO develops and manufactures many types of storage systems to meet different functional needs.

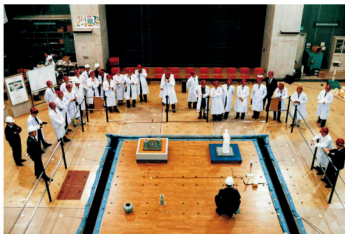

KONGO has established an integrated management system: from initial conceptual plan to final design; manufacture/production, installation and maintenance service.

02

Technology

In case of an earthquakes

Vibration test
for seismic isolation system

Japan, being one of most earthquake-prone countries in the world had many past devastating earthquake incidents, causing loss of properties and lives.

Preventive measures to minimise the damages caused by an earthquake is one of important features that we have incorporated in our product design.

03

Design

Innovative Universal Design

Good Design Award
(METI Award) winner

- Space Mover(1998-1999)
- Hi-Power Z(2001-2002)

KONGO supplies products and services to libraries, public facilities, museums and other facilities where people gathered as part of their regular lives.

Our products are designed based on a good combination in functionality, aesthetic elements, environmental considerations, advanced information technology and cultural aspects.

KONGO provides static shelving, movable shelving, Automated Storage and retrieval system, etc. and proposes storage facilities and environments that suit customer's space requirement.

KONGO products are used by many customers, libraries, museums, hospitals and offices.
